Software Engineering student specializing in React.js and modern web development. Passionate about combining structured engineering with vibe coding to rapidly translate ideas into polished, responsive, and user-focused digital experiences.

EDUCATION

BS Software Engineering

Capital University of Science & Technology (CUST)

Feb 2023 – Present

7th Semester

CGPA: 3.67 / 4.00

ICS – Computer Science

Askaria College for Women

HONORS

Dean's Roll of Honor

Awarded for academic excellence across 6 consecutive semesters.

TECHNICAL SKILLS

WEB TECHNOLOGIES

React.js

JavaScript

ASP.NET MVC

AngularJS

Bootstrap 5

PROGRAMMING

Java

C#

C++

Python

PHP

SQL

TOOLS & METHODOLOGIES

Git / GitHub

Firebase

Figma

Agile / Jira

UI/UX Design

Req. Engineering

Generative AI

SOFT SKILLS

- Problem Solving
- Leadership
- Team Coordination
- Adaptability
- Clear Communication
- Time Management

ACADEMIC & PERSONAL PROJECTS

Immersive VR Environment — Final Year Project

IN PROGRESS

Unity 3D · Kotlin · Firebase · Agora SDK · Photon Fusion 2

- Developing a mobile-based multiplayer 3D virtual environment with real-time voice communication, designed for affordable Google Cardboard VR headsets.
- Targeting users in developing regions by removing the barrier of expensive hardware for immersive experiences.

University Sports Portal

ASP.NET MVC · C# · Bootstrap 5 · MS SQL Server

- Engineered a secure, role-based web application to manage and schedule university sports events across multiple user tiers.
- Designed the full database schema and back-end logic ensuring data integrity and multi-level access control.

EcoHabit Builder

Java · Android Studio · SQLite

- Built a native Android application with gamified task tracking and daily habit management to promote eco-friendly routines.
- Implemented persistent local storage via SQLite and personalized impact reports to sustain user engagement.

Give and Grow Platform

Web Development · SDLC · Requirement Engineering

- Led end-to-end development of a community engagement web platform — from stakeholder requirements through to full deployment.
- Coordinated cross-functional team efforts across planning, design, development, and delivery as project lead.
